

Gympie High LIGHTS 2018

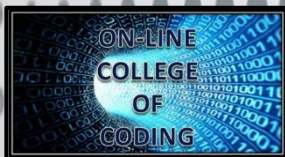

Term 2

Performance

Sports Academy

Coding

Agriculture

Visual Arts

Have you ever wanted to learn how to act? This drama workshop will provide the foundations to acting and build self-confidence

GSHS has over 100 years of sporting excellence. This program rotates through Futsal, Volleyball and Touch Football. These sessions will provide students with the opportunity to experience what it is like to be part of the Centurions Sporting Academy

This three hour game programming workshop will be an intensive hands on experience held in the special IT lab. This workshop will involve creating a game using game maker (no experience necessary)

Students will be immersed in boots-on, hats-on experiences in which they will

- Taste-test local produce
- Get hands on with cattle and poultry
- Learn how to set-up an electric fence
- Find out how a tractor harnesses the power of a hundred horses

This workshop will introduce students to a variety of art materials and techniques. Students will touch on printmaking, size and scale, and the basics of using clay

Placements: 15
Teacher: Ms Pritchard

REGISTRATIONS OPEN 21ST MARCH AND CLOSE 11TH MAY

Gympie High LIGHTS 2018

Term 3

Food Technology

Healthy food creates a healthy mind and body. This four week course focuses on a healthy diet, practical cooking skills, and encourages students to have fun in the kitchen!
NB: please advise of any food allergies.

Design Technology

In this four session introduction to Design & Technology, students will create items using industry standard software and produce their drawn components on a 3D printer.

Illustration

Who loves drawing dragons and fairies? This four week course delivers the basics of illustration techniques with a published author and illustrator. Students will engage in basic drawing skills to release their creative spirits on paper.

STEAM Science

Put on your lab apron and safety glasses and get excited about STEAM! Students conduct a range of experiments from making elephant's toothpaste, to rayon manufacture, to anodising aluminium with their own art work apparatus.

STEM Robotics

Using Arduino, Lego and Sphero SPRK (think BB-8) students will learn to programme robots to be autonomous, enhancing their programming skills and knowledge of sensors. The result - a sumo-style team competition!
